

System Manual

To test the extension:-

1. Issue the CONNECT command from the Client on 127.0.0.1 1234
2. Issue the command: - SYNC test1.txt. Test1.txt is the test file that can be used to check the data synchronization from Client Sync Folder to Server Sync folder.
3. The System has to be run from Eclipse. For Client application, run KVClient class in app_KVClient module, and for Server application, run ServerManager class in app_KvServer module.
